Sliding system to the floor for closet doors with mounting inside the opening.

TO CONSIDER

System designed for 18mm thick doors. For better door stability and sliding, a 3:1 door ratio (3 units high x 1 unit wide) is recommended.

APPLICATIONS

| Closet doors.

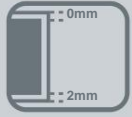

QUALITIES

- | Kit installation requires no machining and includes all hardware to install 2 closet doors.
- | Safe and smooth sliding that prevents derailment and pitching of the doors.
- | The kit's profiles provide an aesthetic finish and its side profiles serve as a handle.
- | The system absorbs unevenness in the span, thanks to the carriage springs and the upper guide rail.
- | H profile that allows the inclusion of different substrates in the door design (not included).
